

TROPICAL ECOLOGY: COSTA RICA!

**SHORT-TERM TRAVEL COURSE
4 CREDIT BIO COURSE**

**TWO WEEKS IN COSTA RICA
IN JANUARY 2024**

**LED AND INSTRUCTED BY PROF. JENNIE RINEHIMER
AND PROF. MADELINE POETHKE**

Tropical rainforests are a center of biodiversity and are of significant ecological importance. This course will immerse students in the tropical rainforests of Central America, allowing for extensive observation and explorations of topics such as animal behavior, ornithology, herpetology, ecosystem services, and biodiversity. In addition to two weeks in a lowland tropical rainforest, the course will also feature pre-departure and post-travel class meetings and activities. Prerequisites: BIO-111 and BIO-112
